

I would like to comment on the above application for refuse collections as follows:

Development of 4 flats. Proposed site plan shows an image for individual wheelie bin storage for 4 bins. Image shows these to be in wooden structure housing. Sufficient waste capacity for refuse, recycling and food waste would be 4 x 180 litre refuse bins plus 4 x 240 litre recycling bins and either one communal 140 litre food waste bin or 4 x individual 23l food caddies. (i.e. 8 wheeled bins plus food bin/s) From where they are sited a maximum pull out distance to be within 10 metres on a straight pull with dropdown onto Swain Road is required. This developer may like to consider 2 x 1100 bins 1 x refuse 1 x recycling with a communal 140 litre food waste bin. Again, from where they are sited a maximum 10 metre pull out distance, level pull to roadside with a dropdown kerb is required.
